## TO BE DEVELOPED

1. Project Creation
  - a. Project Type Dropdown (More Choices, reference partnership creation for the choices)
  - b. Remove the students involved section in academe information
  - c. Move the deliverables and tracking to project details page, mas suited sya don para they can add multiples objs and etc.
  - d. Industry partner information, make sure na ang laman ng dropdown is yung mga company created, if wala pang company created iredirect to partner creation.
  - e. Milestones ay ilipat din sa mismong project details page
2. Project Details Page
  - a. Call all the information relevant to the project
  - b. Add a "add objectives button to deliverables and tracking
  - c. Also add a add milestone button.
  - d. Yung mga add button dapat may mga lalabas na modal, same with ginawa sa partner details (reference mo nalang yun)

- e. Also make sure na sa milestone, add a radio button or checklist to accomplish yung mga milestones
  - f. Add an edit feature to both the milestone and the deliverables
  - g. Repository, file repo nila, redirect mo to file repo and make sure na they can add and delete files doon.
  - h. Tapos sa project completion/accomplishment, they can only accomplish once na complete lahat ng milestones.
  - i. Last is once complete, deretso sila sa project evaluation page, para syang ote and send ko yung mga specified na questions for the eval pag ginagawa mo na.
3. Archived projects
- a. Dito mapupunta yung mga finished projects, then makikita yung mga details and shit
4. Dashboard
- a. Alam mo na to since maggets mo nap ag Nakita mo yung ui
5. Partnership score
- a. List of active partners muna dapat andun
  - b. Then they can search specific partners, then dun lalabas yung current na nasa partnershipScore
